O. Reg. 690/86.

General.

Made—November 26th, 1986.

Filed—November 27th, 1986.

REGULATION MADE UNDER THE PREScription DRUG COST REGULATION ACT, 1986

GENERAL

1. In this Regulation,

“original product” means the original source of a drug product in a particular strength and dosage form that is designated as a listed drug product under Ontario Regulation 689/86 (General) or that was listed as a drug product in the Parcost C.D.I. prescribed under Ontario Regulation 839/84;

“production size lot” means the amount of finished product that is made from the minimum quantity of raw materials specified in a formula that can be processed using full sized production equipment into a dosage form that meets the specifications for the finished product. O. Reg. 690/86, s. 1.

2. Each product that is listed in Schedule 1 of a particular strength and dosage form of a drug is interchangeable with each other such listed product. O. Reg. 690/86, s. 2.

3. For the purposes of section 7 of the Act, the best available price in respect of each product listed in Column 1 of Part B of Schedule 2 is the amount set out opposite thereto in Column 2 of Part B of Schedule 2. O. Reg. 690/86, s. 3.

4. The percentage of the base price that is prescribed for the purposes of clause 7 (3) (b) of the Act is that percentage set out in Part A of Schedule 2. O. Reg. 690/86, s. 4.

5. A person may charge more than the person's usual and customary dispensing fee for a product that is supplied pursuant to a prescription if the person explains why a fee in excess of the usual and customary fee is being charged prior to the dispensing of the prescription and the charging of the additional fee does not result in the person being in contravention of section 47 of Regulation 451 of Revised Regulations of Ontario, 1980. O. Reg. 690/86, s. 5.

6.—(1) The conditions set out in this section apply only with respect to each strength and dosage form of each product for which a submission to the Minister to be designated as interchangeable is made on and after the 31st day of July, 1986.

(2) It is a condition for each strength and dosage form of a product to be designated as interchangeable with other products that the manufacturer of the product submits to the Minister within the time limit set out in Schedule 3,

(a) evidence that the manufacturer meets the standards contained in Good Manufacturing Practices for Drug Manufacturers and Importers, second edition, published by the Health Protection Branch of Health and Welfare (Canada);

(b) if,

(i) the product is a new drug within the meaning of the *Food and Drugs Act* (Canada),

(ii) the Health Protection Branch of Health and Welfare (Canada) has issued a Notice of Compliance to the manufacturer of the product in respect of a new drug submission within the meaning of the said Act, or

(iii) the manufacturer has filed with the said Health Protection Branch a new drug submission that relates to the drug product,

a Notice of Compliance with respect to the product issued under section C.08.004 of Division 8, Part C of the Food and Drug Regulations and a product monograph with respect to the product that has been approved by the Health Protection Branch for the purpose of issuing the Notice of Compliance;

(c) a statement that sets out all the representations that are intended to be made by the manufacturer for the promotion of the product with respect to,

(i) the recommended route of administration of the product,

(ii) the proposed dosage of the product,

(iii) the claims for the product, and

(iv) the contra-indications and side effects of the product;

(d) the Drug Identification Number of the product;

(e) the formula of the product in a manner that clearly indicates all the ingredients and the quantities of those ingredients;

(f) specifications of a pharmacopoeial or equivalent standard for the active raw materials used to make the product and for the finished product;

- (g) documentation with respect to the manufacturing and quality control of the product that shows at least,
 - (i) production work sheets of the manufacturer with respect to the two most current production size lots, and
 - (ii) the sources of the active raw materials used to manufacture the product;
 - (h) a certificate of analysis that shows the results of the tests that were carried out on the active raw materials used to make the product and the finished product and that compares the results of those tests with the specifications for the active raw materials and the finished product;
 - (i) studies that show that the product is stable under the storage conditions specified by the manufacturer for the intended shelf life of the product;
 - (j) a sample of the product that is representative of the production size lots to which the documentation referred to in clause (g) relates packaged and labelled as it is being sold at the time of the submission and in a quantity that is sufficient to complete all the tests necessary to determine whether or not the product meets the manufacturer's specifications for the finished product;
 - (k) a sample of the active raw materials used to make the product that is representative of the production size lots to which the documentation referred to in clause (g) relates in a quantity that is sufficient to complete all the tests necessary to determine whether or not the active raw materials meet the manufacturer's specifications for the active raw materials;
 - (l) proof of the availability of the product for sale as shown by,
 - (i) an invoice or invoices detailing the sale of the product to a drug wholesaler or pharmacy in Ontario, or

 - (o) evidence that the physical properties of the product do not adversely affect patient acceptance of the product to any greater degree than the original product;
 - (p) a list that sets out the cost to the pharmacist or wholesaler for each package size of the product that is offered for sale;
 - (q) evidence that the manufacturer is able to supply the product at the price quoted to the Minister in a quantity that is sufficient to meet the reasonably anticipated demand for the product; and
 - (r) a consent that sets out that the Minister may have access to all information given to the Health Protection Branch of Health and Welfare (Canada) with respect to the product that is in connection with a new drug submission or a supplement relating to the product within the meaning of the *Food and Drugs Act* (Canada) or any other submission that is necessary for the lawful sale of the product in Canada.
- (3) Clause (2) (b) does not apply where the Health Protection Branch gives an opinion in writing that states that a new drug submission or a supplement relating to the product is not required by the Branch and that a notice of compliance is not required for the lawful sale of the product.
- (4) Clauses (2) (m) and (n) do not apply to a product that is the same as a listed drug product with respect to the dosage form, strength, formula and the manufacturing process and testing standards for both the raw materials and the finished product.
- (5) Clause (2) (n) does not apply to a submission that relates to an additional strength of a product of the manufacturer that is a listed drug product where the information previously submitted under clause (2) (n) with respect to the product is sufficient for the purpose of evaluating the interchangeability of the additional strength of the product. O. Reg. 690/86, s. 6.
7. Ontario Regulations 839/84, 63/85 and 224/86 are revoked.
8. This Regulation comes into force on the day that section 14 of the Act is proclaimed in force.

The Ontario Gazette

Vol. 119-52 ISSN 0030-2937 TORONTO, SATURDAY, DECEMBER 27th, 1986

Annual Report

JANUARY 1st, 1983 TO DECEMBER 31st, 1983
SECTION 178.22 CRIMINAL CODE

Pursuant to Section 178.22 (5) of the Criminal Code of Canada, the following is a report prepared for the period January 1st, 1983 to December 31st, 1983, relating to the authorizations for which Agents specially designated in writing by the Attorney General of Ontario for the purposes of Section 178.12 of the Criminal Code have made applications and the interceptions made thereunder.

As in previous years, the Attorney General for Ontario did not designate any police officers for the purpose of making emergency applications as the Province is adequately covered by senior Crown Law officers designated as agents. Therefore, all applications for authorizations were made by senior Crown Law officers who were designated by the Attorney General for Ontario for the purpose pursuant to Section 178.12.

The interception of private communications continues to be an important tool for the investigation, detection, prevention and prosecution of offences in Ontario. The following comments are made with a view to facilitating the interpretation of the statistical data contained in this report.

1. Although only two reported applications for an authorization were refused by the Courts this year, this is due to the very stringent screening by senior police officers and Agents designated by the Attorney General before an application is made to the Judge. The majority of other provinces also report very few refusals.
2. All authorizations are granted subject to certain terms and conditions, and therefore the number of applications made subject to terms and conditions is reported as being the same as the number of applications granted.
3. The number of notifications, informing the person that he has been the subject of an interception, is not necessarily the same as the total number of persons listed under sections (d) and (e) of the statistical material. The same person may be listed under all three subsections of sections (d) and (e) where an authorization contains multiple offences.
4. Where authorizations were obtained which were in effect "renewals" and were related to the same persons and the same investigation, duplicate figures were not reported as this would give a distorted statistical view. For example, if four authorizations were related to the same investigation and the same four persons were named in each authorization and, for example, if four convictions were

obtained, these were not reported as 16 persons and 16 convictions, but rather as four persons and four convictions.

5. With particular reference to section (1)—court proceedings where evidence adduced, and, resultant convictions—the following should be taken into consideration:
- (i) section 1 (ii) refers to the number of “proceedings” (court) that resulted in a conviction and not the number of “persons” convicted. The actual number of persons convicted is proportionate to the number of persons arrested;
 - (ii) the difference between the number of authorizations obtained and resultant convictions is explained by the fact that only a relatively small number of proceedings relating to charges for which an authorization has been obtained are instituted in the same calendar year as the authorization was granted. However, it will be seen that the ratio of convictions reported in any calendar year to the number of proceedings instituted in the same calendar year is very high.

Annual Report

JANUARY 1st, 1984 TO DECEMBER 31st, 1984
SECTION 178.22 CRIMINAL CODE

Pursuant to Section 178.22 (5) of the Criminal Code of Canada, the following is a report prepared for the period January 1st, 1984 to December 31st, 1984, relating to the authorizations for which Agents specially designated in writing by the Attorney General for the purposes of Section 178.12 of the Criminal Code have made applications and the interceptions made thereunder.

As in previous years, the Attorney General for Ontario did not designate any police officers for the purpose of making emergency applications as the Province is adequately covered by senior Crown Law officers designated as agents. Therefore, all applications for authorizations were made by senior Crown Law officers who were designated by the Attorney General for Ontario for the purpose pursuant to Section 178.12.

The interception of private communications continues to be an important tool for the investigation, detection, prevention and prosecution of offences in Ontario. The following comments are made with a view to facilitating the interpretation of the statistical data contained in this report.

1. A study of the Project Summarization forms submitted by our police forces indicate that in three cases, as many as seven authorizations were taken out in relation to the same investigation as some changes in the authorizations would preclude obtaining a renewal, for example, the addition of a name or a change of address. This factor should be taken into consideration when assessing the number of authorizations granted.
2. It should also be noted that in some cases, an authorization may be obtained with no resultant interceptions in situations where evidence comes to light rendering the interceptions unnecessary. In other instances a likely suspect may be "cleared" by the interception absolving him of criminal responsibility in a particular investigation and as a result, of course, no charges are laid.
3. Although only one reported application for an authorization was refused by the Courts this year, this is due to the very stringent screening by senior police officers and Agents designated by the Attorney General before an application is made to the Judge. The majority of other provinces also report very few refusals.
4. All authorizations are granted subject to certain terms and conditions and therefore the number of applications made subject to terms and conditions is reported as being the same as the number of applications granted.
5. The number of notifications informing the person that he has been the subject of an interception is not necessarily the same as the total number of persons listed under sections (d) and (e) of these statistics. The same person may be listed under all three subsections of sections (d) and (e) where an authorization contains multiple offences.
6. Where authorizations were obtained which were in effect "renewals" and were related to the same persons and the same investigation, duplicate figures were not reported as this would give a distorted statistical view. For example, if four authorizations were related to the same investigation and the same four persons were named in each authorization and if four convictions were obtained these were not reported as 16 persons and 16 convictions, but rather as four persons and four convictions.
7. With particular reference to section (1)—court proceedings, where evidence adduced and resultant convictions—the following should be taken into consideration:
 - (i) section 1 (ii) refers to the number of "proceedings" (court) that resulted in a conviction, not the number of "persons" convicted. The actual number of persons convicted is proportionate to the number of persons arrested;
 - (ii) the difference between the number of authorizations obtained and resultant convictions is explained by the fact that only a relatively small number of proceedings relating to charges for which an authorization has been obtained are instituted in the same calendar year as the authorization was granted. However, it will be seen that the ratio of convictions reported in any calendar year to the number of proceedings instituted in the same calendar year is very high.
